Total	3,537	100.00	6,032	100.00	513	100.00	10,082⁴	100.00

¹ Because many individuals list anticipated degrees in the database, degree totals include only cases where date of degree has passed (that is, up to and including 2008). Data reflect actual membership on 12/31/2008.

² This is the percentage of each sex holding a particular type of degree.

³ This category includes cases where degree was not reported or highest degree was not clear.

⁴ Discrepancies in total membership numbers between these tables and previously published figure of 10,396 arise from database accounting inconsistencies.

¹ For sex-specific categories, this value represents the percent of the employment category filled by the specified sex (e.g. 43.28 percent of those who reported themselves as students were female). For "Total" percent, this value represents the percent of the total membership falling into a specified employment category.

² This category includes faculty and researchers affiliated with colleges, universities, and community colleges.

³ This category includes teachers and administrators at the elementary and secondary levels.
