

Table of Contents

Foreword	vii	
Douglas Richardson		
Introduction	1	
David DiBiase		
I. What is Geographic Information Science and Technology?	5	
The Domain of GIS&T		5
II. Why is a GIS&T Body of Knowledge Needed?	9	
Workforce needs		9
The GIS&T education infrastructure		15
Applications of the GIS&T Body of Knowledge		23
III. How Does the Body of Knowledge Relate to GIS&T Curriculum Planning Efforts?	27	
Longstanding concern about GIS&T education		27
National-scale curriculum development efforts		28
IV. How Was the Body of Knowledge Developed?	33	
Model Curricula vision		33
Advancing the vision		36
V. GIS&T Knowledge Areas	39	
Format of the GIS&T Body of Knowledge		39
Knowledge Area: Analytical Methods (AM)		43
Knowledge Area: Conceptual Foundations (CF)		58
Knowledge Area: Cartography and Visualization (CV)		69
Knowledge Area: Design Aspects (DA)		80

Knowledge Area: Data Modeling (DM)	89
Knowledge Area: Data Manipulation (DN)	97
Knowledge Area: Geocomputation (GC)	102
Knowledge Area: Geospatial Data (GD)	112
Knowledge Area: GIS&T and Society (GS)	127
Knowledge Area: Organizational and Institutional Aspects (OI)	135
VI. Where is the UCGIS Model Curricula project headed?	145
Evolution of GIS&T	145
Evolution of the GIS&T education infrastructure	145
Future Model Curricula products and services	147
References	149
Acknowledgements	157
Editors (2004-06)	157
Model Curricula Task Force (1998-2003)	157
Body of Knowledge Advisory Board (2004-2006)	158
