

CONTENTS

Introduction - Jonathan H. Smith	1
Section I	
National and International Practices	
1 The United States 2001 National Land Cover Database Collin Homer, Jon Dewitz, Joyce Fry, and Nazmul Hossain	5
2 Land cover in Mexico Ing. Francisco Javier Jiménez Nava	13
3 Satellite land cover mapping of Canada's forests: The EOSD land cover project Michael A. Wulder, Morgan Cranny, Ronald J. Hall, Joan Luther, André Beaudoin, Joanne C. White, David G. Goodenough, and Jeff Dechka	21
4 European land cover mapping – the CORINE experience Stefan Kleeschulte, Gyorgy Büttner	31
5 Developing land cover and land use data sets for the Australian continent – A collaborative approach Michelle Barson	45
6 FAO land cover mapping initiatives John Latham	75
Section II	
Ecosystem Approaches	
7 Applications of national land cover maps in United States forestry Kurt Riitters and Gregory A. Reams	97
8 Approaches to IPCC land-use and land-use change reporting in agriculture areas with remote sensing Rasim Latifovic and Darren Pouliot	107

9	Terrestrial ecosystems of South America Roger Sayre, Jacquie Bow, Carmen Josse, Leonardo Sotomayor, and Jerry Touval	131
---	---	-----

Section III

Conservation and Environmental Assessments

10	Land cover and conservation: From protected areas to landscapes John A. Wiens , Mark G. Anderson , and Timothy Boucher	153
11	Use of midresolution land cover data for rapid comparison of community vulnerability to tsunamis Nathan Wood	169
12	The Critical Ecosystem Assessment Model (CrEAM): Identifying healthy ecosystems for environmental protection planning Mary L. White, Charles G. Maurice, Amy Mysz, Thomas Brody	181
13	Importance of land cover and biophysical data in landscape-based environmental assessments K. Bruce Jones	215

Section IV

Community Practices

14	The fundamental role of land cover data in a web-based decision support system to assist local natural resource managers and decision makers Yi Shi, John D. Snyder, Jeremiah Asher, Jon B. Bartholic, and Glenn O’Neil	251
15	Evaluating hydrological response to forecasted land-use change William G. Kepner, Darius J. Semmens, Mariano Hernandez, And David C. Goodrich	275
16	Land cover data and tools for analyzing alternative futures: One state’s lessons learned Dreux J. Watermolen, Wisconsin Department of Natural Resources	293

Section V

Summit Breakout Sessions

17	Land cover and indicators of environmental quality Moderated by K. Bruce Jones and E. Terrence Slonecker, U.S. Geological Survey	331
18	Land cover and ecosystem condition Moderated by Roger Sayre, U.S. Geological Survey	335

19	Hazard identification and forecasting Moderated by Carl Shapiro, U.S. Geological Survey	341
20	Land cover and global change Moderated by Patricia Jellison, U.S. Geological Survey	345
	Summary – K. Bruce Jones	351
