
The Professional Geographer

INFORMATION FOR AUTHORS

The Professional Geographer, initially a publication of the American Society for Professional Geographers, became a journal of the American Association of Geographers in 1949. It publishes short articles of academic or applied geography, emphasizing empirical studies and methodologies. These features may range in content and approach from rigorously analytic to broadly philosophical or prescriptive. The journal provides a forum for new ideas and alternative viewpoints.

Submission. All manuscripts should be submitted electronically through the ScholarOne Manuscripts portal located at <http://mc.manuscriptcentral.com/aag>. ScholarOne Manuscripts allows for rapid submission of original and revised manuscripts, and facilitates the review process and internal communication between authors, editors, and reviewers via a web-based platform. ScholarOne technical support can be accessed at <http://mchelp.manuscriptcentral.com/gethelpnow/>.

Submissions must include a cover letter containing a statement that the manuscript has not been submitted for publication elsewhere, and will not be submitted elsewhere until a decision has been rendered by the editor. Any questions should be directed to the Managing Editor at profgeog@aag.org.

Review. After evaluation by the editor, manuscripts are normally sent to at least two outside reviewers. The review process normally takes four to six months and every effort is made to respond as quickly as possible.

Manuscripts. Prepare your manuscript using Microsoft Word. Do not put any identifying information in your manuscript or your file names to ensure a blind review. This includes names of the authors, their affiliations and bio sketches, or acknowledgements (this information can be added to your final files if your paper is accepted for publication). All author contact information will be saved separately when uploading your submission to Manuscript Central. Please include the title, abstract, and key words in the body of your manuscript even though you will be asked to save them separately as part of the upload process. Reviewers will only have access to these if they are part of your manuscript file.

Do not embed tables or figures in your manuscript file. They should be placed at the end of the document or uploaded separately. Figure files can be uploaded as .gif, .jpg, .eps, and .tif; however, only .eps or .tif files can be used for publication purposes.

Manuscripts, with the exception of references, tables, or figures, should be no longer than 5,000 words. Text must be in a 12-point font with 1 inch margins. All parts of the manuscript (abstract, text, notes, references, tables, and figure captions) must be double-spaced and paginated. Format manuscript as follows, starting each section with a new page: (1) title page, (2) abstract, (3) text, (4) notes, (5) references, (6) appendix, (7) tables, (8) figure captions, (9) figures.

Title Page. The title serves as the author's invitation to a diverse audience; it should be chosen with care. Do not include any identifying information on the title page, including the names of the authors, their affiliations or contact information, bio sketches, or acknowledgments.

Abstract/KeyWords. Include an abstract of 200 words or less that summarizes the purpose, methods, and major findings of the paper. Also provide three to five key words or phrases by which an article can be indexed in periodical references. These should appear in italics at the end of the abstract.

Acknowledgments. Do not include any acknowledgments in your submission. This includes any grants/financial support; you will be asked for this information when loading your submission to ScholarOne but it should not be included in your manuscript files. Acknowledgments including funding support can be added to your final files if your paper is accepted for publication.

Units of Measure. *The Professional Geographer* uses the International System of Units (metric); other units should be noted in parentheses.

Equations. Equations should appear in the text in an appropriate type style (Greek letters, bold type, etc.). Authors should carefully distinguish between capital and lower-case letters, Roman and Greek characters, and letters and numerals. Number equations sequentially, in parentheses on the right edge of the text. All constituent terms should be defined when they initially appear.

Notes. Specific arguments or single points may be amplified by concise Notes numbered sequentially in the text. The list of Notes appears immediately after the text.

References. References should be cited parenthetically in the text in this order: author's last name, year of publication, and page number. All sources in the text of a paper must be listed in the references section and vice versa. List all references alphabetically by the author's last name and chronologically, and if possible, please include full names for all authors. Provide the full, unabbreviated title of books and periodicals. Personal communications can be cited either in endnotes or in the references section. All newspaper articles and articles from weekly magazines should be fully cited in the references section rather than worked into the text of the paper. For examples of the correct style for various forms of publication, see recent articles in *The Professional Geographer*, *The Professional Geographer* Style Sheet (available at <http://www.aag.org/cs/publications/journals/pg>), and the 15th edition of the *Chicago Manual of Style*, published by the University of Chicago Press.

Tables. All tables must be referenced in the text. Each table must be typed double-spaced on a separate page in the same 12-point font as the text, and numbered sequentially with Arabic numerals. Each table must have a descriptive title as well as informational column and row headings. Decimals appearing in tables should include leading zeros: 0.1273 rather than .1273. For examples of the preferred table style, see recent articles in *The Professional Geographer*.

Graphics. Maps, graphs, and photos should convey ideas efficiently and tastefully. Graphics must be legible, concise, and referenced in the text. Illustrations must be designed to fit the page and column format of *The Professional Geographer*. A full-page graphic must not exceed 5.9 inches (wide) by 8.8 inches (long), or 2.8 inches by 8.8 inches for a single column figure, including space for the figure caption which will be typeset by the printer. Intermediate sizes are acceptable.

For printing purposes, all graphics must be computer generated and will be accepted in the following formats only: EPS (Encapsulated Postscript) or TIFF (Tagged-Image File Format) for raster images. Type sizes below 6 point should be avoided. For further instructions, please see *The Professional Geographer* Graphics Guidelines (available at <http://www.aag.org/cs/publications/journals/pg>).

Authors may print three color figures at no charge. Authors wishing to include additional print color figures will be expected to pay \$200 for each additional figure.

Copyright. Authors must sign a copyright transfer agreement before their paper can be published. In accordance with copyright laws, the manuscript must not duplicate substantial portions of previously published material. If a manuscript incorporates previously published material (in the form of text, tables, or figures), the author is responsible for obtaining written permission from the copyright holder and for any costs associated with the use of the copyrighted materials. Further advice and information is available on the Taylor and Francis Author Services website (<http://journalauthors.tandf.co.uk/copyright/usingThirdPartyMaterial.asp>).

Final Submission. The final version of each article (including all tables, figures, etc.) should be submitted electronically via the ScholarOne portal. Final Submission Guidelines will be provided by the Managing Editor upon acceptance of the paper by the Editor.

Copyediting will be undertaken once the manuscript has been accepted and entered into production. Authors will have the opportunity to review their typeset galley pages before the article is published. Page proofs are sent to the designated corresponding author. They must be carefully checked and returned within 48 hours of receipt.

Reprints. Each corresponding author will receive one complete copy of the issue in which the article appears and 25 complimentary reprints of their article upon registration with Rightslink, Taylor & Francis' authorized reprint provider. Authors will need to create a unique account and register with Rightslink for this free service. The link is provided at the time of page proof review. Complimentary reprints are not available post publication. A discount on additional reprints is available to authors who order before print publication.
