SPECIAL EVENTS

Opening Session and Exhibitor Reception

Journalist John Noble Wilford will speak on "A Science Journalist's Perspective on Geography" at the opening session of the New York City meetings. The session will be held at 5:30 p.m. on Tuesday, 27 February 2001 in the Grand Ballroom East of the New York Hilton Hotel. Wilford is the winner of two Pulitzer Prizes, one for national reporting of science topics in 1984 and a second, shared with other *New York Times* science reporters, for their team effort in reporting on the Challenger explosion and its aftermath. He currently serves on the board of directors of the American Geographical Society.

Wilford earned a B.S. degree from the University of Tennessee in 1955. He also received an M.A. from Syracuse University. Before joining the *New York Times* in 1965, Wilford worked for the *Wall Street Journal* and for *Time* magazine. At the *New York Times*, he has served as science correspondent, assistant national news editor, and director of science news.

In addition to reporting, Wilford has been author, coauthor, or editor of eight books, including his 1981 book *The Mapmakers* and his 1991 volume *The Mysteries of Columbus*. He contributed a chapter entitled "Writing Books on Science Topics" to Deborah Blum and Mary Knudson's *A Field Guide for Science Writers*. His specialty has been space science and exploration and he has covered all the major space programs, including the Apollo moon landings, the shuttle and the missions to distant planets. He also writes extensively on paleontology, archaeology and other scientific subjects. As a reporter, Mr. Wilford has traveled throughout the world. Since 1987, Mr. Wilford has hosted a radio feature, *Science & Technology*, every Tuesday on WQXR radio.

Immediately following the Opening Session there will be an Exhibitor's Reception in the Americas Hall I of the New York Hilton Hotel. SPECIAL EVENTS

Presidential Plenary Session

Kofi Annan, seventh Secretary-General of the United Nations, will give a talk on the role of geography in the United Nations in AAG President Susan Cutter's Presidential Plenary Session scheduled for noon on Thursday, 1 March 2001 in the Grand Ballroom East of the New York Hilton Hotel. Mr. Annan, the first Secretary-General to be elected from the ranks of United Nations staff, began his term on 1 January 1997.

Mr. Annan's priorities as Secretary-General have been to revitalize the United Nations through a comprehensive program of reform; to strengthen the UN's traditional work for peace and development; to encourage and advocate human rights, the rule of law and the universal values of equality, tolerance and human dignity found in the United Nations Charter; and to restore public confidence in the UN by, in his words, "bringing the United Nations closer to the people."

Mr. Annan was born in Kumasi, Ghana. He completed his undergraduate work in economics at Macalester College in St. Paul, MN in 1961. From 1961 to 1962, he undertook graduate studies in economics at the Institut Universitaire des Hautes Etudes Internationales in Geneva. Annan joined the United Nations system in 1962 as an administrative and budget officer with the World Health Organization in Geneva. Before being appointed Secretary-General, Mr. Annan served in numerous capacities in many UN programs and projects, including as Assistant Secretary-General for Peacekeeping Operations and as Under Secretary-General.

Past President's Address—"The Nature of Geographic Knowledge"

Past President Reginald G. Golledge will present his address to the Association on Friday, 2 March in Grammercy A of the New York Hilton Hotel at 11:40 am.

Geography has changed dramatically over the past half century since Richard Hartshorne wrote *The Nature of Geography*. The discipline has expanded its content, developed a theoretical core, defined a discipline-specific language, created innovative methods of data collection and analysis, and invented new technology. Just as we now know more about the world—particularly its multiple environments and its multitude of peoples—we know more about the way this knowledge is accumulated. The talk will discuss the nature of geographic knowledge as it is known today, the abundance and richness of concepts embedded in geographic knowledge, and the universality of geographic thinking.

SPECIAL EVENTS

INSTRUCTIONS TO SESSION CHAIRS

1. Adhere rigorously to the times printed in the program. Each session presentation is assigned a specific time. If you have a no-show, use his or her time for a discussion of the preceding paper(s) or for a recess. Do not shift later papers into such voids. That is unfair to participants who plan to hear a particular presentation.

2. Consult the program addenda for cancellations in your session. Paper withdrawals are noted in the daily bulletin. Plan how you will use any free time for the benefit of the session.

3. Hold each individual to the time allotted. You will be given four signal sheets to alert each speaker to the time remaining (10 minutes, 5 minutes, 2 minutes, and 1 minute). If a speaker continues after time has expired, rise, ask those present to join you in thanking the speaker, and announce the next presentation. Be polite but implacable. The audience and other speakers will respect and support strong direction on your part.

4. Note the location of the nearest house phone. Should a medical emergency or problem with room lighting, temperature, etc. arise the house phone will connect you to the hotel and assistance will be provided.

Secondly, should a problem arise with any audiovisual equipment, contact a Program Assistant or AAG Staff member for assistance. A Student monitor will check on your session occasionally and may help you summon assistance, but you should be prepared to do so independently. Monitors are not trained to operate or repair audiovisual equipment.
